

# Ceranock

Ceranock is specially designed to minimise fruit damage while significantly reducing pesticide application. This is a safe, effective and environmentally friendly fruit fly solution. Zero residue in fruit and fresh produce means no more risk to consumers and no adverse effect on beneficial insects or non-target species. Russell IPM's Ceranock is an innovative, sustainable, practical and residue-free solution for the fruit fly species of *Bactrocera*, *Ceratitis* and *Dacus*.

## Protects a variety of fleshy, soft fruits and vegetables, including:

Mango

Guava

Sour orange

Marula

Papaya
